NJ/NJR Series

All-Around Screw Presenter

Supports wider screw diameters than the NS/NSR series and has greater capacity, making it even more useful.

"For details, please refer to each product's specification

Manual NJ-23 NJ-45 NJL-23 NJL-45

NJC-23 NJC-45

Robotic NJR-23 NJR-45 NJRL-23 NJRL-45

Supports standard bits from various screwdriver manufacturers

- Bit screwdrivers
- Suction screwdrivers

Large stock

Supports a stock of 150cc.

Special screws supported

Allows you to stably present SW screws or those with washers.

• Long-running operation when combined with screw hopper

Use a screw hopper for long-running unmanned operations.

Smooth screw feeding

- Provides ongoing, timely presenting of screws to match robot operations.
- The NJ type allows the screw pick-up signal to be sent through an external outlet.
- The NSR type allows for a signal to be sent through an external outlet to notify whether a screw is present at a screw pick-up point.

NJ Series: Swap rail set (passing plate, rail)

NJR Series: Swap rail set (passing plate, escaper, rail)

*NJ Series: Swap rail set (retainer plate for countersunk screws)

Sample applications / NJ + RR (rail for robotic devices)

Swap rails in/out.

This single unit supports a wide range of screws. For example, the NJ-23 supports four types of screws in a single unit. Allows the angle of rail inclination to be adjusted based on the screw being used.

Example usage of combining NJ and RR rails

Use as a horizontal presenter for continuous presenting to robotic devices. If you are seeking the same functionality in a different model, please contact us.
